South Bohemia Mathematical Letters
Volume 17, (2009), No. 1

Contents

Section 1: Applications of Mathematics

J. Chvalina, M. Novák: *Multistructures created by non-invariant subgroups of the group of linear ordinary second-order differential operators* 1

J. Klaška: *On the applications of ordered sets* 11

J. Klimek, Z. Šmarda: *Singular Cauchy problem for implicit Volterra integro-differential equations* 27

G. Krech: *On the alternate Poisson integral of function of two variables for Hermite expansions* 33

M. Novák: *Potential of the "Ends lemma" to create ring-like hyperstructures from quasi-ordered (semi)groups* 39

Section 2: Didactics of Mathematics

H. Binterová, E. Fuchs, P. Pech: *On introduction of quadratic function by computer at school* 51

R. Hašek, V. Petrášková: *Web interactive tool to improve financial literacy* .. 61

L. Samková: *An unconventional way of using computers in mathematical education — Advertising mathematics* 71

J. Vaníček: *Mathematics and project-based learning employing technologies* .. 77

G. Weiss: *Ratios and mean values: a topic in art, architecture and mathematics* 93
