

On the teaching mathematical modeling and simulation by using the *AnyLogic* modeling program

Arpad Takači

Department of Mathematics and Informatics, Faculty of Sciences
University of Novi Sad,
takaci@dmi.uns.ac.rs

The teaching of mathematical modeling and simulation to computer science students has a long history on the Department of Mathematics and Informatics, Faculty of Sciences in Novi Sad. In this talk, I give a short presentation of the Russian *AnyLogic* modeling program and present its use in teaching population dynamics, discrete simulation, and agents based models.
