

WMI2 - the symbolic calculator for the today's student

Zoltan Kovacs, University of Szeged, Hungary

WebMathematics Interactive 2 (WMI2, <http://matek.hu>) is a web based on-line graphical calculator designed to be as easy to use as possible. It is available in 10 languages and can be used in many areas of mathematics education, including introductory algebra and calculus, linear algebra and number theory. The talk will give a report about the experiences of use of WMI2 at University of Szeged, Hungary. The talk will also raise didactic questions occurred as using WMI2 in praxis, and also answers will be shown as we used students' feedback for enhancing this software.
