

The Future of GeoGebra

Yves Kreis and Markus Hohenwarter, University of Luxembourg and Johannes Kepler University Linz

The development team of GeoGebra is growing and very busy. Besides GeoGebra was selected to participate in the Google Summer of Code (GSoC) initiative where 5 students have been assigned to the association.

In our presentation we will show alpha and beta development ideas which might get included in a future GeoGebra version: GeoGebraCAS, GeoGebra3D, GeoGebraTouch, Layout Manager, Locus Line Equation, Implicit Plotting, ...
